EDUCATION

BSc Software Engineering
Miva Open University (in view)

Mobile & Web App Developer

I build the apps people download on their iPhone or Android phone, and the websites they open in a browser. Each one is engineered from a cybersecurity standpoint and built to industry security standards.

5+ YEARS OF EXPERIENCE

17+ PRODUCTS LAUNCHED

3 IOS, ANDROID, WEB

WORK *experience*

LICENVA
AUG 2026 – PRESENT

iOS, Android & Web App · Ohio, US

A mobile and web platform that helps physicians keep every credential in one secure vault, plan state licenses, track renewals, and share verified document packets.

Credential vault for licenses, board certifications, DEA, and life support · Licensing plans with state fees, timelines, and requirement tracking · Career readiness scoring against target states

PRACI
FEB 2025 – PRESENT

iOS & Android App · United Kingdom

The mobile companion to the Praci workforce platform. Workers check in to shifts with location and biometric verification, follow their tasks and calendar, and review attendance logs for themselves and their team.

Location-verified check-in with biometric confirmation · Today view for attendance, tasks, shifts, and notifications · Attendance log by day, week, and month, with a team view

DRIVEDOCKET
AUG 2026 – PRESENT

iOS & Android App · New York, US

A driver compliance app that keeps license, registration, insurance, and vehicle recalls in one place, with a compliance score and alerts before anything lapses.

Driver and vehicle compliance score · Document storage for license, registration, and insurance · Recall checks against the NHTSA database

COMMUNISOLVE
NOV 2025 – PRESENT

Mobile App Developer · Texas, US

Designing and shipping user-friendly iOS and Android apps with React Native, aligning product goals with stable, polished releases.

Feature planning with cross-functional teams · Reusable UI systems and navigation flows · Stability checks, QA handoffs, and store readiness

RAMA DREAMS
APR 2023 – PRESENT

Mobile Developer · United Kingdom

Built and maintained mobile products with React Native + Expo, focusing on clarity, speed, and smooth user flows.

Multi-screen journeys built for retention · Design collaboration for consistent UX · Release cycles, fixes, and performance tuning

MAAZ ISHAQ ADEMU

TOOLS

Mobile
React Native, Expo, Swift

Web
React, Next.js, TypeScript, JavaScript, Tailwind

Data and servers
Supabase, PostgreSQL, MongoDB, Express

State and workflow
Redux, Zustand, Git, Postman, Jira, Trello

SECURITY FIRST

Every product is engineered from a cybersecurity standpoint: secure sign in, encrypted data, protected servers, tested before launch.

EARLIER *roles*

ADELEPAY
APR 2024 - MAY 2025

Mobile App Developer · Remote

Delivered fintech-ready mobile experiences with Expo and React Native, keeping user trust and transaction clarity top of mind.

27
FEB 2024 - DEC 2024

Full Stack Web Developer · United Kingdom

Developed web applications and landing experiences that balance speed, structure, and clean design.

PYRAMID FINANCE
OCT 2022 - MAR 2023

Mobile Developer · Nigeria

Built mobile apps with React Native, collaborating closely with backend teams to deliver reliable features.

OTIF
MAY 2022 - NOV 2022

Frontend Web Developer · Remote

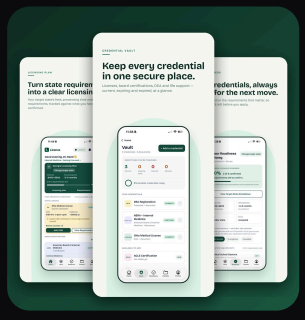

Created responsive web interfaces in React.js, translating UI/UX designs into clean, efficient code.

AMITAF
SEP 2021 - AUG 2022

Mobile App Developer (Internship) · On site

Delivered key features for a fintech mobile application serving both consumers and investors.

PRODUCT *gallery*
